

## Get Glowing Skin

Dermapen™ microneedling is a sought-after skin renewal procedure that treats a wide range of conditions. When done correctly and in a sterile environment, Dermapen Treatments™ can have rapid and impressive results.

Dermapen™ microneedling visibly improves:

Ageing or sun-damaged skin

Fine lines and wrinkles

Acne and breakouts

Scarring

Pigmentation

Rosacea

Enlarged pores

Stretch marks

Unwanted tattoos

Hair loss

## Testimonials

“

I was scared Dermapen™ microneedling would feel like a face tattoo, but it was nothing like that! At most, it felt like a scratch with your fingernail. It was an easy thing to do and my face is so glowy and smooth now. I can't wait for my next procedure.

— Dee

“

My skin looks even and youthful. I look so much younger than my counterparts. It's also improved wrinkles and scarring.

— Susie

“

I received 3rd degree burns to my neck and chest when I was 1 ½ year old. For as long as I can remember, I have been self-conscious about my scarring, until I had four Dermapen Treatments™. Wow, I'm beyond impressed. It really has been a life changer for me. I can now wear whatever I want with confidence, and my scarring is barely noticeable. Thank you DermapenWorld™.

— Nicole

## Dermapen™ Microneedling FAQs

### How long until I see results?

Results typically may be seen after just one clinical procedure. However, cumulative procedures and at-home protocols may be required to achieve the full desired result. The regenerating process will continue for up to 24 months following a procedure.

### Do Dermapen Treatments™ hurt?

Of all the microneedling devices in the world, the Dermapen 4™ is far less painful. We don't even recommend numbing the area beforehand because it's so comfortable. Our correct DermapenWorld™ protocols and aftercare are designed to soothe and camouflage any visible redness or sensation of heat.

### Are Dermapen Treatments™ safe?

Yes. Only a qualified practitioner may perform Dermapen™ clinical procedures under strict sterile conditions. All treatment consumables are single-use and sterile.

### What's the downtime?

Localised erythema may last up to 2 days post-procedure. Dp Dermaceuticals™ COVER RECOVER™ may be used immediately following a procedure to reduce any visible redness. Most patients can resume normal activities immediately after a clinical procedure.

### Are you ready to reveal your most radiant complexion?

Dermapen Treatments™ offer noticeable long-lasting results. Book an appointment with your Authorised Treatment Provider today.

## What is Dermapen™ Microneedling?

Restore radiance and erase  
skin concerns with a natural boost  
of collagen and elastin

**Dermapenworld**

## Why choose Dermapen 4™?

We're confident that the Dermapen 4™ offers far superior results, with less pain and downtime than any other product on the market.

Impressive results

Increased comfort

Faster procedures

Minimal downtime

Covers larger areas

Targets multiple concerns

Reduced epidermal damage

## Long-lasting Results

After some initial dryness, you can expect to see results after just one Dermapen Treatment™. Subsequent treatments will produce lasting, significant results, particularly when following the recommended post-treatment homecare.

## How Dermapen Treatments™ Work

DermapenWorld's™ skin-care solutions work in synergy with each other and your skin to erase concerns and reveal your most radiant complexion ever.

## Clinical Procedures

Superfine microchannels are created with the Dermapen 4™ at controlled depths in your skin to boost collagen and elastin production. Restorative actives are delivered deep into the skin layer for targeted, visible rejuvenation.

## Dp Dermaceuticals™

The non-negotiable skincare range for Dermapen™ microneedling works with your skin's natural function to offer you real, noticeable results. Used in-clinic and daily at-home for faster results.

## At-Home Protocols

The success of your clinical procedure is maintained and maximised with an at-home daily skincare routine and cosmeceutical devices, including Dp Dermaceuticals™ L.E.D. therapy and at-home microneedling.

## Anti-Contamination Management

Your safety is our priority. DermapenWorld™ practitioners and their patients are fully supported with the necessary equipment and education to perform hygienic procedures.
